For unique customized profiles please include a layout drawing or description below;  
 \* Include detailed information such as distance between linear lamps, spots and aluminum caps.  
 \*\* Zaneen will supply submittal drawing for approval once a Purchase Order is received.

Available for International specifications by adding 'INT' at the end of the existing Model #. International spec sheets are available upon request.

For assistance to write your "custom" specification, email your inquiry to: [specification@zaneen.com](mailto:specification@zaneen.com). You will receive a response within 1-2 business days.  
 Zaneen reserves the right to change the specifications and/or materials without notice. Please check [www.zaneen.com](http://www.zaneen.com) for the most recent updates.

### Type Suspension (Non-IC Type)

Rated for Dry or Damp locations (IP20)

**Approval** Certified by C.S.A. for North American Standards.

**Emission** Direct only, Direct/ Indirect or Indirect only.

### PROFILE

**Measurements** w. 195mm (7 11/16")

**Beam Profile & Modules** Anodized extruded aluminum beam profile up to 8'-0" long. Profiles are joined with a coupler to ensure uniform appearance and easy installation.

Modules can be repositioned after installation of the beam profiles. Additional modules may be installed after installation. Modules are free floating. Extruded aluminum offers high reflective surface and excellent heat dissipation.

**End Cap** has no visible screws.

### Finishes

Standard; Natural anodized aluminum

Optional; 25 colors offered using premium powder coated finish.

Profile, end caps and modules can be specified in different finishes.

**Suspension Cable** 1/16" aircraft cable supplied with chrome gripper.

Maximum suspension from ceiling to top of the fixture is 2m.

Maximum space between aircraft suspension cables is 1.8m.

**Splitter and plug connector** come with the order for easy installation.

### INSERTS

#### LED

#### Spot

#### LED

**14W LED Spot (2700K, 1170lm / 3000K, 1220lm / 4000K, 1300lm)**

Offered in 3 reflector choices (20°, 40° and 60°) and 25 color options for lamp ring.

**24W LED Spot (2700K, 2850lm / 3000K, 3030lm / 4000K, 3290lm)**

Offered in 3 reflector choices (20°, 25° and 40°) and 25 color options for lamp ring.

Minimum spacing between the LED spots is 345mm (13 9/16") for both Spot 1 and Spot 2 both with integral power supplies.

**Lamp Combination** For specific lamp combinations or configurations, please specify the overall length and attach a sketch or drawing of the intended configuration. Zaneen will supply submittal drawings for approval once an order is received.

### ELECTRICAL

Luminaires are pre-wired with a factory installed branch circuit wiring and quick-release connectors. Through wiring is used to connect the luminaires.

**Fluorescent Ballast** Electronic high power factor ballast. Specify 120V or 277V. Ballast is pre-wired with leads to one end of fixture. Ballast is positioned behind lamp insert and is fully accessible from below.

0-10V, Lutron 3-wire or Lutron digital dimming options are available.

\* Lutron dimming ballast is used as standard, 120V/ 277V.

**Emergency** To be installed remotely.

**Emergency Circuit Wiring** Upon request.

**Emergency Testing Switch** is to be installed close to the emergency ballast equipped fixture. An installation kit will be supplied by Zaneen.

### WARRANTY

Zaneen provides a limited warranty from date of purchase to original purchaser.

**LED Inserts** : 5 year

Rated for 50,000 hours at 70% lumen output (L70)

**LED Driver** : 5 year

**Fluorescent / Ballast** : 5 year

**Dimming Ballast** : 3 year

**12V Transformer** : 1 year

**Non-Electrical Components** : 1 year
